

ACCOUNTING

From Study to Skills

Accounting involves the examination, organization, management and design of accurate recording and reporting procedures of financial and business transactions. Some major specializations include public accounting, tax accounting, cost accounting, government accounting, budget accounting and internal auditing.

The Rutgers-Camden program in accounting provides students with a comprehensive foundation in the theory of accounting, financial accounting and reporting, managerial and cost accounting, taxation, concepts of auditing, and business law. It is built on a broad background in humanities, liberal arts, economics and business administration. The accounting program gives students the foundation and skills to pursue careers with public accounting firms, corporations, government, and nonprofit organizations. The program provides the background to sit for the Certified Public Accountant (C.P.A.), Certified Management Accountant (C.M.A.), and Certified Internal Auditor (C.I.A.) examinations.

Related Fields: Finance, Economics, Management, Marketing, Human Resources, International Business, Entrepreneurship, and E-commerce Technology

Skills and Abilities

Research Skills- Students will learn and research changes in city, state or federal government policies and regulations.

Information Technology Skills- Accounting students will learn technology job skills. Students will use finance-specific software programs, such as Hyperion and QuickBooks; and cloud computing.

Communication Skills- Students will communicate with others via email, phone conversations, in-person meetings and presentations. Students will also relay information clearly and concisely.
