

SUMMER SESSION 2024 PLANNING CALENDAR

This calendar is used for planning courses for the Summer Session 2024. Please note that all courses should adhere to these available schedules for purposes of billing, registration deadlines, and room scheduling.

MINIMUM REQUIRED TIMES: Courses have minimum instructor contact hours to meet accreditation regulations. These are: 1 credit = 13.3 hours (800 minutes); 2 credits = 26.7 hours (1600 minutes); 3 credits = 40 hours (2400 minutes); 4 credits = 53.3 hours (3200 minutes). For purposes of these hours, 0.3 hours = 15 minutes; 0.5 hours = 30 minutes; 0.7 hours = 45 minutes. Note there is no separate exam period for summer session courses. If the instructor wishes to give an exam, the exam is offered within the regular class schedule.

SECTION ID'S AND SESSION ID'S: Each SECTION is denoted with a letter and a number. The letter determines the date range of the course, and the number determines the time of day. Each section also has a SESSION ID, which is the code that drives the registration and billing transactions for that date range. The SESSION ID is used in CSS in the Summer Session Dates field in course construction.

FOUR-WEEK VS. SIX-WEEK – most courses should be scheduled in four-week rather than six-week sessions. Six-week sessions are usually only used for graduate courses or laboratory sciences requiring an extended schedule. Students in general strongly prefer the four-week sessions based on past enrollment trends and student surveys.
